Electrical & Mechanical Engineers

Morrison-Maierle, Inc. has exciting opportunities in our expanding Wyoming operations for Mid and Senior Electrical and Mechanical Engineers.

Morrison-Maierle is an employee-owned company offering professional opportunities and lifelong benefits — it is a place you can build a career. We prize candidates who live our core values of integrity, commitment, respect and excellence. The person in this position will help us to deliver on our core purpose: creating solutions that build better communities. If you want to apply your skills, learn and grow in a collegial environment, and tackle challenging project work we want to hear from you.

As a regional firm anchored in the western United States, Morrison-Maierle has approximately 300 employees and is currently ranked within the Engineering News Record’s “Top 500 Design Firms.”

| Opportunity | We are looking to expand our Buildings Market Group into Wyoming. This exciting opportunity is for Electrical and Mechanical Engineers who want to be founding members of the Wyoming Buildings Market Group. You must be motivated to establish our Wyoming presence in the market as well as have enthusiasm for helping grow the group.

These Electrical and Mechanical Engineering positions will work innovatively and collaboratively with the firm’s full service Mechanical, Electrical, Structural Buildings Market Group, as well as with the Civil Engineering disciplines within Morrison-Maierle to create comfortable, healthy, energy efficient, sustainable, and productive spaces. Our team approach to buildings and structures promises to deliver final projects that are coordinated, cost-effective, sustainable solutions that will meet the needs of our clients for the long-term.

**Electrical Engineers:** Designing of power plans: receptacle and HVAC and owner equipment power connections, main electrical equipment room layouts, 1-line diagrams, emergency generator and uninterruptible power systems. Panel and equipment schedules. Designing of lighting plans: light fixture layouts, lighting calculations, photometric lighting analysis, lighting controls. Designing of systems plans: fire alarm, voice / data, security, paging and public address systems.

**Mechanical Engineers:** Designing, planning, scheduling, conducting and/or coordinating detailed phases of studies, investigations, and preparation of contract documents for HVAC and plumbing systems, energy studies/improvements, sustainable design elements and other components for buildings and facilities.

**Mid-level Engineers:** Duties will include working under the direction of the Project Manager and Phase Managers in the execution of project related duties.

**Senior Engineers:** These positions will provide a rewarding opportunity for a person driven to exceed client and firm expectations in the areas of: managing budgets, schedules and deliverables; undertaking the technical work associated with engineering...
design; leading business development pursuits; leading, managing and mentoring junior engineers. Project management, client service and team leadership skills are fundamental to the firm’s daily environment.

**Qualifications**

Bachelor’s degree in Electrical or Mechanical Engineering. Master’s degree preferred.

**Mid-Level:** Minimum of 4 years’ experience, preferably in Architectural Engineering industry. A professional engineering (PE) license is preferred.
